

## What opportunities should the industry focus on in the near future?

### Suggestion

### Same suggestion by others

Global Collaboration of Data

8

Youth Development

RGTAG/Exports

6

More AI Training

[Link](#)

One Breed Society

5

Developing staff/employee Programs

4

Farm Safety

3

OHS for Facilities of service providers

Use Robot Dairy Data

AI Technician working list availability/anywhere

2

Business Support - Tools/HR/OHS/Legal

Exchange for AI Tech's

Genomics in more breeds

Get in touch with schools – traineeships

International Worker Programme

NHIA communication

Accreditation of service providers facilities

1

AI Learning ie camera for type classification

AI Tech - data input app

Beef on dairy information

Beef on Dairy Investment

Better investment in sustainability marketing ideas

Calves the By Product

Collaboration of inline milk meters for bull proofs & breed awards

Career Days

Data Connect – everyone

Develop supply chain for Dairy Beef

Developing Dairies

Diversity - for jobs

Diversity - Keeps things interesting

Dual purpose breeding program

Farm Affordability

Farm Industry Expo

Farmer upskilling

Genetics Gains

Group Building Activities

How can Artificial Intelligence be used

Improve locations/regions on disease

Industry Events

Interaction

Long Term Genetics trade partners

OHS for AI Technician

One cloud network for data collection

One industry standard for semen collection

Optimising Breed Strategies

Reduce Industry Duplication

Regular on farm Visits

Research

Service provider staff accreditation

Social Licence - right to farm

Streamline Data

Support/promote AI Training providers
